

RAHUL KUMAR

Java Full Stack Developer

☎ +91-7050185954 ✉ rahulkr705018@gmail.com 🌐 [Rahul Kumar](#) 📄 [Rahul Kumar](#) 📁 [Portfolio](#)

Professional Summary

Java Full Stack Developer with 3+ years of experience designing, building, and supporting enterprise-grade web applications across the full SDLC. Strong hands-on expertise in **Java, Spring Boot, Spring Data JPA, Hibernate and RESTful microservices, paired with modern frontend development using React.js, TypeScript, Redux, and the MERN stack.** Proven record delivering production code, resolving high-priority incidents on Microsoft Azure, and translating designs into scalable interfaces. Seeking to bring deep Java backend expertise and full-stack versatility to a Senior Software Engineer role.

Technical Skills

Languages: Java 8/11, JavaScript (ES6+), TypeScript, SQL, C++

Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, REST APIs, Microservices, JWT, Swagger/OpenAPI, Multithreading, Exception Handling, Node.js

Frontend: React.js, Redux, React Hooks, Next.js, Node.js, Express.js, Bootstrap, SCSS, jQuery, Responsive Design

Databases: MySQL, PostgreSQL, MongoDB, JDBC, Query Optimization, Data Modelling

Cloud & DevOps: Microsoft Azure, Azure Monitor, Application Insights, Docker, Jenkins, CI/CD, Maven

Testing & Tools: JUnit, Mockito, Postman, IntelliJ IDEA, Git, GitHub, JIRA

Professional Experience

Associate Software Engineer | Accenture

April 2024 – Present

Client: VodaCom Role: Fullstack Java Developer

Mar 2026 – Present

- Developed **service-layer business logic** using **Core Java and Java 8**, following clean and modular coding practices.
- Implemented key Java concepts including **Collections and Exception Handling** to enhance application performance and reliability.
- Designed and developed **RESTful Web Services** to support HTTP operations and enable smooth communication between system components.
- Build and maintained application modules using **Spring Boot**, ensuring scalable and maintainable architecture.
- Performed database operations and optimized queries using PostgreSQL for efficient data retrieval and persistence.

Client: Merck Group (Healthcare HRMS Platform) Role: Java Developer

July 2025 – Feb 2026

- Developed features for the Resource Management module — staff allocation, scheduling, and utilization tracking — end to end across API and UI layers.
- Built and consumed Spring Boot **REST APIs with Spring Data JPA and Hibernate for persistence, including request validation and error handling.**
- Translated Figma designs into responsive **React.js and Redux** interfaces aligned with the application's design system.

Client: Microsoft

Aug 2024 – June 2026

- Debugged **React.js** modules within the Azure portal ecosystem, isolating functional anomalies and performance bottlenecks across enterprise-scale modules.
- Conducted **code reviews** for React and JavaScript (ES6+)/TypeScript codebases, enforcing clean-code standards and identifying defects before deployment.
- Reviewed and validated REST API implementations against code-quality standards, closing **80+ defect tickets** and improving overall code reliability.
- Collaborated with cross-functional teams in an **Agile/Scrum** environment to prioritize and resolve production incidents within defined SLA timelines.

Subject Matter Expert | Chegg India Pvt. Ltd.

March 2022 – October 2022

- Authored 1000+ detailed solutions across Data Structures and Algorithms, OOP, DBMS, Operating Systems, and web development.

Projects

AI Trading Journal — Java, Spring Boot, PostgreSQL, React, TypeScript, OpenAI API Aug 2026 – Sep 2026

- Built a full-stack AI-powered trading journal with a **Spring Boot REST API, PostgreSQL persistence via Spring Data JPA, and a React/TypeScript** dashboard; parses broker statement PDFs into structured trade data with automated deduplication.
- Integrated the **OpenAI API** for AI-generated trade analysis and weekly performance reviews using custom prompt engineering, with strategy tagging, trade notes, screenshot attachments, and multi-dimensional filtering (symbol, day, time, date range).
- Deployed end-to-end (Render for backend and database, Vercel for frontend).

College Social Media Website | Next.js, Node.js, MongoDB, Redux

- Built a social platform for students to share experiences and join discussions, with **authentication, posts, comments, and profiles**.

E-Commerce Website | MERN Stack

- Developed a **full-stack store with React.js and Node.js**, offline data persistence, multi-provider authentication, and Redux cart and order state.

Education

B.Tech, Computer Science and Engineering — Bhagalpur College of Engineering (75.74%) 2023

Senior Secondary (BSEB) — Bhagalpur City College, Bhagalpur (69.4%) 2018

Achievements

- **Global Rank 40 in CodeChef Starters 17C contest** (November 2021).
- Secured 93.4 percentile in JEE Mains among 900,000+ candidates (April 2019).
